

Antares

Vehicle Mount Solutions

Antares offers the Onyx range of innovative non destructive (no drill holes) and removable vehicle mounts for laptop computers, tablet pcs, phones and GPS units.

Antares Onyx mounts are made of ultra strong carbon fibre, aluminium and magnesium alloy to minimise weight whilst providing maximum strength. The extensive range caters for a wide variety of vehicle makes and models and being fully adjustable, facilitates clearance for air bags and other cabin obstacles.

Easily mount a laptop, tablet or camera weighing up to 4 KGs

Flexible cradles adjust to fit commercial tablets or laptops up to 15" or use rugged computer manufacturers' purpose built vehicle cradles.

Multiple elbows and telescopic segments provide unlimited adjustment to minimise impact on airbags while maintaining a comfortable viewing position.

Quick release "snap lever" allows instant fitting/removal of pole. If the seat mount rail is accessible, a range of forks and attachment hardware caters for most passenger and utility vehicles.

**Easily mount a tablet, gps
or dvd player weighing up to 2 KGs**

Antares

Unique cup holder design allows instant installation or removal in a wide variety of vehicles. The carbon fiber construction creates a rigid, unbreakable and lightweight mounting solution.

Articulating elbows provide flexible adjustment to maintain a safe and comfortable viewing position.

Mounting mechanism fits almost any sized console cup holder cavity. A simple "turn of the screw" tightens or releases the mount.

No cup holders! Then try our headrest mount. Can be used to play DVDs to amuse back seat passengers or mount tablets in a variety of positions to suit your application. Limited by your imagination and seat adjustment range!
